incubated, with virus twice a day since he arrived. His terrible death, with all the symptoms of hydrophobia in its worst form, has seriously shocked public confidence in the effectiveness of Pasteur's discovery. The first positive indications that the patient's system was resisting treatment manifested on Sunday, after he had been vaccinated with the fifth dose. His condition afterwards became the victim of most terrible suffering and this seemed to increase hourly up to the time of his death, which occurred while the man was mad and wild, with physical torture. The corpse has been removed to Pasteur's laboratory, where it will be made the subject of experiment by scientists. M. Pasteur has much reason to believe that the symptoms caused by this failure of his method, but he insists that it establishes nothing.
